

MOHAMMED ABDUSLAM MOHAMMED NAGI

Full Stack Developer | +967 730-467-534 | alsabry615@gmail.com | Taiz, Yemen

<https://github.com/Almndob>

PROFESSIONAL SUMMARY

Recent Information Technology graduate (Full Stack Developer) with practical experience in building integrated web platforms. Seeking to join **Yemen Soft** to contribute to the development of innovative ERP solutions and advance technical skills within a professional environment.

WORK EXPERIENCE

Freelance Web Developer | 03/2025 – 05/2026

- **6Tech Student Services Platform:** Developed a comprehensive web platform for student services, streamlining user management, service requests, and administrative dashboards with a modern, responsive interface. (Technologies: Laravel, Tailwind CSS, Alpine.js, MySQL). [\[https://6tech-sa.com\]](https://6tech-sa.com)
- **Hail Municipality Digital Portal:** Built advanced administrative interfaces for sorting and classifying reports, simulating CRM systems to enhance the efficiency of municipal data management. (Technologies: PHP 8, HTML5, Tailwind CSS, JavaScript, Alpine.js, MySQL). [\[https://github.com/Almndob/hail-portal\]](https://github.com/Almndob/hail-portal)
- **Hail Neighborhood Quality Index System:** Designed and implemented a web-based Geographic Information System (GIS) to evaluate neighborhood quality and support data-driven decision-making using interactive maps. (Technologies: PHP, Bootstrap, Leaflet.js, MySQL). [\[https://github.com/Almndob/hail-quality-index\]](https://github.com/Almndob/hail-quality-index)
- **"Sbul" Platform for Worshippers' Trips:** Integrated mapping services for real-time route tracking and designed an interactive UI to improve user experience within the worshippers' transportation system. (Technologies: PHP 8, MySQL, Leaflet Maps). [\[https://github.com/Almndob/sbul_transport_system\]](https://github.com/Almndob/sbul_transport_system)
- **Student Portal - Comprehensive Student Follow-up System:** Developed a responsive and integrated student management platform to maintain records, improve communication, and effectively track academic performance. (Technologies: PHP, HTML, CSS, JavaScript, MySQL). [\[https://github.com/Almndob/student_portal\]](https://github.com/Almndob/student_portal)
